DETAILED ACTION

Allowable Subject Matter

Claims 1-8 and 12 are allowed over the prior art record.

1. The following is an examiner's statement of reasons for allowance:

2. The closest prior art of record

Hughes et al (US Patent 5,754,655 teaches a system for remote purchase payment and remote bill payment transactions. <http://www.fortworthgov.org/h2online/faq.asp> teaches a method for secure network bill payment. Hanck (WO 9847264) teaches a method for checking hash values in digital data.

What they fail to teach or suggest:

A.

providing said primary account number to a database of card information and comparing the primary account number with said database to provide a preliminary assessment categorizing the card as 1) known to be debit capable, 2) unknown to be debit capable, or 3) known to be only credit capable, processing known only credit capable cards using a credit protocol, processing known debit capable cards using a modified debit protocol that initially assumes a PIN authorization debit protocol and prompts the cardholder to enter the PIN authorization, said modified debit protocol defaulting to an either a non PIN based authorization debit protocol or credit protocol when a request to override is received and thereafter following the protocol according to the request to override, and processing unknown to be debit capable cards using a protocol that initially requires a clarification signal selecting a debit or credit protocol and completing the transaction according to the selected protocol.

These distinct features render claim 1 allowable.

Claims 2-8 are dependant upon claim 1 and are allowable for at least the same reasons.

B.

conducting a preliminary assessment whether the particular transaction is capable of being settled using a debit point of sale transaction network, requesting the entry of a PIN when the preliminary assessment indicates the capability of being settled as a debit transaction and upon entry of the PIN settling the transaction through a debit point of sale transaction network and settling the transaction through a credit transaction network if the card is not debit capable; and including in the event the preliminary assessment is uncertain whether the transaction is capable of being settled using a debit point of sale transaction network seeking additional information from the card holder with respect to entry of information clarifying whether the transaction is to

Art Unit: 3621

be settled as a PIN based debit transaction or non PIN based transaction and thereafter using the appropriate: PIN based settling through the debit point of sales transaction network or the credit network, and further including adding to said database BIN information with respect to any PIN based debit transactions successfully settled where the preliminary assessment was uncertain whereby future transactions using the particular card will be recognized as capable of settlement using the debit point of sale transaction network,

These distinct features render claim 12 allowable.
